A. Results T	Table – Report results for each SLO. If an SLO was assessed by multiple measures, report data for each measure. Is needed to accommodate the number of SLOs and measures.
B. SLO	Status Table – Based on the results reported in the above table and referring
to the p	rogram proficiency target, indicate the current status of program SLOs as
	rtially Met, Not Met, or Unknown. Add rows as needed to accommodate
addition	al SLOs.
